

Inside This Issue:

The Machine Behind the Product

Ever wondered how our Security Containers are manufactured? In this issue of The Alpha Safe Insider, we will be taking a closer look at one of the state-of-the-art machines that make up our Security Containers, our Robotic Welders, and what it ultimately means to you when you purchase a Security Container from Alpha Safe.

Insider Tips / DIY Instructions

Do you have an older Alpha Safe Security Container with an X-09 lock? Have you ever experienced issues with the lock not wanting to unlock after dialing your combination? Chances are, if you dialed the correct combination, noticed that "OP" was displayed on the lock's LCD and turned the lock's dial indefinitely clockwise without it ever unlocking, you may have an earlier version of the X-09 lock. If this is the case and you are locked out of your Security Container, try these helpful tips first before contracting an X-09/X-10 Certified Technician to drill the container open. This may end up saving you quite a bit of money in the end.

Employee Spotlight

Have you ever wondered who the men and women were behind the scenes that build our GSA-Approved Class 6 Security Containers? In this issue of The Alpha Safe Insider, we would like to introduce and recognize the man behind the machine, Roger Crider, Lead Robotic Welder.
